

Week5-e.html

1. Modify week5-e.html to produce output as per below. Some of the obvious styles such as text being centered are not stated in the requirements section, but you must implement them in your work.
2. Additional instructions can be found in the comment of the html file.
3. For the gif files in the material pack, place them in the following: dancing.gif in folder *assets/images/id*, pigeon.gif in *assets/images/my* and flying.gif in *assets/images/th* folder
4. Watch the sample output video

Im just a bold. using element selector, make me blue without changing the color in the #thebold{color: red;font-size: 1.75em} to blue

I am H4!
